

Thank you for purchasing shadcn/ui - Pro Blocks!

Make sure to follow the instructions below to get started.

How to use Pro Blocks?

1. **Locate files** - navigate to the pro-blocks folder in your downloaded zip file to find all component .tsx files.
2. **Setup requirements** - First ensure shadcn/ui is installed in your project. If not, [install it](#) now.
3. **Add components** - Copy your desired Pro Block files into your project's components folder.
4. **Install dependencies** - Check the imports section of each Pro Block file and install required shadcn/ui components [using the CLI](#).
5. **Start Using** - Your Pro Blocks are now ready for use and customization.

Note: Remember to replace the <Logo /> component with your own project logo.

How to get new updates?

Every time we release a new update, you can access the new files via your Receipt or Lemon Squeezy account. Learn more [on our website](#).
